## PROFESSIONAL SUMMARY

Results-oriented Microsoft Power BI Developer and Data Analyst with over 3 years of experience in Data Visualization, advanced Power BI functionalities, SQL and GCP. Consistently recognized as an Outstanding Performer, seeking career opportunities to enhance skills in data solutions and drive strategic business insights.

## PROFESSIONAL EXPERIENCE

### LTIMINDTREE

Role: Data Analyst

Client - L'Oréal

Pune, India

June 2021 - Present

- Developed complex Power BI dashboards with 150+ KPIs, improving decision-making speed by 40% for retail beauty clients across APAC.
- Collaborated with cross-functional teams for requirement gathering and performance analysis, resulting in a 30% improvement in project alignment with business needs.
- Integrated data from Google BigQuery and other sources to enhance reporting capabilities, increasing data accuracy by 25%.
- Optimized Power BI report performance through data modeling and query tuning, reducing report load times by 50%.
- Implemented advanced DAX calculations, Row-Level Security (RLS), and custom visuals, enhancing report interactivity by 40%.
- Managed Power BI services, including data refresh scheduling and report deployment, ensuring 99% data availability.
- Developed Power BI dataflows to standardize data preparation and ensure data consistency across reports.
- Conducted Power BI training sessions for business users, new joiners increasing self-service BI adoption by 30%.
- Created and maintained Power BI templates for uniform report generation across multiple departments, streamlining the reporting process.
- Implemented Power BI Embedded solutions for integrating analytics into customer-facing applications, enhancing client service capabilities.
- Coordinated in the creation of pipelines for reporting sellouts and media dashboards, reducing manual reporting efforts by 60%.
- Assisted in designing bespoke databases as a Data Modeler, enhancing data retrieval efficiency by 35%.
- Facilitated the deployment of Cloud Run services for ETL jobs, integrating data from various sources using Cloud Build, resulting in a 50% increase in data processing speed.
- Supported in Composer Airflow DAGs for data orchestration in GCP BigQuery, improving data flow management by 45%.
- Optimized GCP BigQuery SQL scripts using partitioning/clustering concepts, reducing query costs by 30%.
- Handled critical production issues, achieving a 95% issue resolution rate within a few hours.
- Awarded Outstanding Performer for 3 consecutive years.

## TECHNICAL SKILLS:

**Data Visualization & BI Tools:** Microsoft Power BI, Power Query, Power Pivot, Data Modeling, Dataflow, ETL, Power Apps, Power Automate, DAX Studio, Tabular Editor

**Languages & Frameworks:** DAX, SQL, Python, C++(Basic)

**Performance Optimization:** Power BI Performance Tuning, DAX Studio, Tabular Editor, Data Refresh Strategies, SQL Query Performance Tuning

**Tools & Technologies:** DAX Studio, Tabular Editor, GCP, BigQuery, SSMS, SSRS, MSBI, Excel, GIT, DBMS

**Methodologies:** Agile, Scrum

**Concepts:** Data Visualization, Dashboards, Presentations, Designing, Business Intelligence, Business Requirement's, Data Integration, Data Analytics, Data Analysis, Data Validation, Data Modeling, KPI's, ETL Processes, Gateways, What-If Analysis, Data warehousing, AutoML, Admin, Troubleshooting, SDLC, Unit Testing, GIT Push, Documentation

## EDUCATION

Vellore Institute of Technology, VIT University

Bachelor of Technology (computer science and engineering).

Aug 2017 – June 2021

## CERTIFICATIONS

**Microsoft Certified: Power BI Data Analyst Associate (PL-300) -Valid through 2025**

**Microsoft Certified: Fabric Analytics Engineer Associate (DP-600) - Valid through 2025**

**Google Cloud Certified: Associate Cloud Engineer - Valid through 2026**

**HackerRank SQL (Advanced) - 2024**

**Oracle Java SE 8 Programmer – 2018**
